

A complete 360° approach for the Ultimate Facial

Indulge your skin in a deep cleanse and peel, break down congested and blocked pores, enrich and hydrate with vitamin packed infusions and tighten and tone lax and tired skin with the latest non-invasive technologies.

Measurable Results

A HD picture via the inbuilt HD Skin Analysis Camera will be taken pre and post treatment to identify existing conditions and record treatment efficiency.

bespoke facial experience**

Hydra Facial

Introducing our multi-technology skincare platform

The *Hydrafacial* is a non invasive treatment delivering long term results & amazing skin. Using 8 technologies for your best skin yet!

How it Works

Aqua therapy utilises hydromerabrasion and combines hydrogen molecules, AHAs & BHAs to exfoliate and deep cleanse the skin, whilst vitamin infused solutions deliver hydrating and nourishing effects.

Radio frequency is a proven method of stimulating collagen production, delivering tighter, firmer skin. Hot and cold therapy and ultrasound technologies provide immediate results with smoother, tighter, lifted and refreshed skin with improved texture, tone balanced brightness for both pre and anti-ageing conditions.

Skin hydration is improved with oxygen enriched atomisation of cosmeceuticals, increasing skin function and health.

Book a consultation today
